Chosen Option: 3

### Comprehension:

Read the given passage and answer the questions that follow.

According to legend, ancient Rome was founded by the two brothers, and demigods Romulus and Remus on 21 April 753 BCE. The legend claims that in an argument over who would rule the city (or, in another version, where the city would be located) Romulus killed Remus and named the city after himself. This story of the founding of Rome is the best known but it is not the only one.

Other legends claim the city was named after a woman, Roma who travelled with Aeneas and the other survivors from Troy after that city fell. Upon landing on the banks of the Tiber River, Roma and the other women objected when the men wanted to move on. She led the women in the burning of the Trojan ships and so effectively stranded the Trojan survivors at the site which would eventually become Rome. Aeneas of Troy is featured in this legend and also, famously, in Virgil's Aeneid, as a founder of Rome and the ancestor of Romulus and Remus, thus linking Rome with the grandeur and might which was once Troy.

Still other theories concerning the name of the famous city suggest it came from Rumon, the ancient name for the Tiber River, and was simply a name given to the small trading centre established on its banks or that the name was derived from an Etruscan word, which could have designated one of their settlements.

Originally a small town on the banks of the Tiber, Rome grew in size and strength, early on, through trade. The location of the city provided merchants with an easily navigable waterway on which to traffic their goods. The city was ruled by seven kings, from Romulus to Tarquin, as it grew in size and power. Greek culture and civilisation, which came to Rome via Greek colonies to the south, provided the early Romans with a model on which to build their own culture. From the Greeks they borrowed literacy and religion as well as the fundamentals of architecture.

The Etruscans, to the north, provided a model for trade and urban luxury. Etruria was also well situated for trade and the early Romans either learned the skills of trade from Etruscan example or were taught directly by the Etruscans who made incursions into the area around Rome sometime between 650 and 600 BCE (although their influence was felt much earlier). The extent of the role the Etruscan civilisation played in the development of Roman culture and society is debated but there seems little doubt they had a significant impact at an early stage.

SubQuestion No: 16

Q.16 According to legend, what did Roma do to stop the Trojan men at the banks of the Tiber?

Ans

✓ 1. She burnt the trojan ships.

X 2. She established a trading centre.

3. She destroyed the city of Troy.

X 4. She declared herself as the ruler.

In the following passage, some words have been deleted. Read the passage carefully and select the most appropriate option to fill in each blank.

Concerned and responsible Indian citizens can encourage sensible consumption (1)\_\_\_\_\_. This can be done by shopping less and wasting (2)\_\_\_\_\_ lesser; by buying local products to keep the cottage industries and (3)\_\_\_\_ crafts alive. In essence, by valuing their rich (4)\_\_\_\_ and living simple and meaningful lives, Indians can set (5)\_\_\_\_ and show the West that India is much more than a well of business opportunities.

SubQuestion No: 25

Q.25 Select the most appropriate option to fill in blank no.5.

Ans X 1. an incentive

X 2. a citation

X 3. an instance

4. a precedent

Question ID : 65497839677 Status : Answered Chosen Option : 4

Section: Quantitative Aptitude

Q.1 Study the given graph and answer the question that follows.

In 2020, if the imports increased from 2019 by the same percentage as in 2019 over its previous year, then what were the amount of imports (in  $\overline{*}$  crores) in 2020?

Ans

X 1. 450

X 2. 480

**3**. 500

X 4. 420

Question ID: 65497839606 Status: Answered

Chosen Option: 1

**Q.2** The area of a triangular park, whose sides are 160 m, 300 m and 340 m, is  $4\frac{17}{22}$  of the area of a circular park. What is the perimeter (in m) of the circular park (correct to one decimal place)? (Take  $\pi = \frac{22}{7}$ )

Ans

X 1. 253.2

× 2. 248.8

**√** 3. 251.4

X 4. 240.2
