### Comprehension In the following passage, some words have been deleted. Read the passage carefully and select the most appropriate option to fill in each blank. When trees are illegally or irresponsibly cut, forest ecosystems are (1) Their ability to store carbon, shelter wildlife, filter water, and to provide food, products, and jobs for is compromised. Global forest loss also leads to more greenhouse gases in the (2). This is much more than what comes from all cars, trucks, trains, planes and ships (3)in the world. But when forests thrive, they absorb carbon dioxide and (4) down climate change. Protecting forests does much more than just keep trees standing because forests are of the planet and serve as the home, market and apothecary of people living on the (5) it SubQuestion No: 20 Q.20 Select the most appropriate option to fill in blank no. 5. Ans X 1. feet 2. lungs 🗙 3. brain 🗙 4. chest Question ID : 65497839800 Status · Answered Chosen Option : 2 Comprehension: Read the given passage and answer the questions that follow. The French capital, Paris, hosts a dozen 'repair cafes' - free, monthly initiatives that allow local residents to fix household objects and electronics with the help and advice of enthusiastic volunteers. Pioneered by journalist Martine Postma in Amsterdam in 2009, hundreds of similar workshops take place across Europe. Nearly two-thirds of Europeans would rather repair their products than buy new ones. "We're a society of waste and overconsumption," says Emmanuel Vallée, organiser of the Repair Café Paris, which typically sees around 25 people attending per event, including some online, since it launched in May 2019. "We throw things away that we don't need to and buy new gadgets before exploring the possibility of repair. The cycle continues. It's a vicious circle.' For Vallée and repairers like him, there's a lot of work to be done. The world produced nearly 45 million tonnes of e-waste in 2016 as consumers and businesses threw out their old smartphones, computers and household appliances - material worth an estimated \$62.5bn. Only 20% was properly recycled. In Europe, where the problem is particularly acute, researchers estimate that only 12% to 15% of mobile phones are properly recycled - despite around 90% of the population owning one. E-waste, which is often shipped illegally from the West to sprawling, toxic dumpsites in countries like the Philippines, Ghana, Nigeria and China, is expected to grow to more than 52 million tonnes by the end of 2021, and to double by 2050 - making it the fastest growing type of domestic waste in the world. The environmental impact ranges from huge carbon emissions to pollution of water sources and food supply chains. But significant amounts of that waste could be avoided through repairs. According to a study, only 40% of electronics breakdowns in France are repaired. But surveys have found nearly two-thirds of Europeans would rather repair their products than buy new ones. French officials truly believe the current system is broken and needs to be fixed. In an effort to defuse this vast amount of avoidable waste, France's National Assembly last year voted to introduce an index of "reparability" ratings for appliances such as washing machines, lawnmowers, televisions and smartphones. In doing so, the French government hopes to increase the electronics repair rate to 60% within five years. SubQuestion No : 21 Q.21 The purpose of starting the project 'Repair Cafes' was to: X 1. invite people to learn how to avoid repairing appliances Ans 2. encourage people to repair gadgets thus reducing waste 🗙 3. educate people about many ways of waste disposal imes 4. teach people the safe use of electronic appliances Question ID : 65497840108 Status : Answered Chosen Option : 2

#### Comprehension:

Read the given passage and answer the questions that follow.

The French capital, Paris, hosts a dozen 'repair cafes' – free, monthly initiatives that allow local residents to fix household objects and electronics with the help and advice of enthusiastic volunteers. Pioneered by journalist Martine Postma in Amsterdam in 2009, hundreds of similar workshops take place across Europe. Nearly two-thirds of Europeans would rather repair their products than buy new ones.

"We're a society of waste and overconsumption," says Emmanuel Vallée, organiser of the Repair Café Paris, which typically sees around 25 people attending per event, including some online, since it launched in May 2019. "We throw things away that we don't need to and buy new gadgets before exploring the possibility of repair. The cycle continues. It's a vicious circle."

For Vallée and repairers like him, there's a lot of work to be done. The world produced nearly 45 million tonnes of e-waste in 2016 as consumers and businesses threw out their old smartphones, computers and household appliances – material worth an estimated \$62.5bn. Only 20% was properly recycled. In Europe, where the problem is particularly acute, researchers estimate that only 12% to 15% of mobile phones are properly recycled – despite around 90% of the population owning one.

E-waste, which is often shipped illegally from the West to sprawling, toxic dumpsites in countries like the Philippines, Ghana, Nigeria and China, is expected to grow to more than 52 million tonnes by the end of 2021, and to double by 2050 – making it the fastest growing type of domestic waste in the world. The environmental impact ranges from huge carbon emissions to pollution of water sources and food supply chains.

But significant amounts of that waste could be avoided through repairs. According to a study, only 40% of electronics breakdowns in France are repaired. But surveys have found nearly two-thirds of Europeans would rather repair their products than buy new ones. French officials truly believe the current system is broken and needs to be fixed.

In an effort to defuse this vast amount of avoidable waste, France's National Assembly last year voted to introduce an index of "reparability" ratings for appliances such as washing machines, lawnmowers, televisions and smartphones. In doing so, the French government hopes to increase the electronics repair rate to 60% within five years.

#### SubQuestion No : 22

Q.22 By introducing an index of 'reparability' ratings for appliances it is expected:

- Ans 🛛 🗙 1. electronics repair rate will go down very soon
  - X 2. new purchases will be reduced completely
  - 3. waste that is harming the environment will reduce considerably
  - X 4. that waste generation will be more or less zero

Question ID : 65497840112 Status : Answered Chosen Option : 3

#### Comprehension:

Read the given passage and answer the questions that follow.

The French capital, Paris, hosts a dozen 'repair cafes' – free, monthly initiatives that allow local residents to fix household objects and electronics with the help and advice of enthusiastic volunteers. Pioneered by journalist Martine Postma in Amsterdam in 2009, hundreds of similar workshops take place across Europe. Nearly two-thirds of Europeans would rather repair their products than buy new ones.

"We're a society of waste and overconsumption," says Emmanuel Vallée, organiser of the Repair Café Paris, which typically sees around 25 people attending per event, including some online, since it launched in May 2019. "We throw things away that we don't need to and buy new gadgets before exploring the possibility of repair. The cycle continues. It's a vicious circle."

For Vallée and repairers like him, there's a lot of work to be done. The world produced nearly 45 million tonnes of e-waste in 2016 as consumers and businesses threw out their old smartphones, computers and household appliances – material worth an estimated \$62.5bn. Only 20% was properly recycled. In Europe, where the problem is particularly acute, researchers estimate that only 12% to 15% of mobile phones are properly recycled – despite around 90% of the population owning one.

E-waste, which is often shipped illegally from the West to sprawling, toxic dumpsites in countries like the Philippines, Ghana, Nigeria and China, is expected to grow to more than 52 million tonnes by the end of 2021, and to double by 2050 – making it the fastest growing type of domestic waste in the world. The environmental impact ranges from huge carbon emissions to pollution of water sources and food supply chains.

But significant amounts of that waste could be avoided through repairs. According to a study, only 40% of electronics breakdowns in France are repaired. But surveys have found nearly two-thirds of Europeans would rather repair their products than buy new ones. French officials truly believe the current system is broken and needs to be fixed.

In an effort to defuse this vast amount of avoidable waste, France's National Assembly last year voted to introduce an index of "reparability" ratings for appliances such as washing machines, lawnmowers, televisions and smartphones. In doing so, the French government hopes to increase the electronics repair rate to 60% within five years.

#### SubQuestion No : 23

Q.23 "The cycle continues. It's a vicious circle." The writer calls it a vicious circle because:

Ans X 1. keeping old, broken stuff in our houses due to storage issues is a huge problem

2. the cycle of buying, throwing and again buying continues in a harmful way

imes 3. we are helpless when things break and we can't do without them  $\circ$ 

ig X 4. we need to buy new gadgets and their disposal is not our concern

Question ID : **65497840110** Status : **Answered** Chosen Option : **2** 

#### Comprehension:

Read the given passage and answer the guestions that follow.

The French capital, Paris, hosts a dozen 'repair cafes' - free, monthly initiatives that allow local residents to fix household objects and electronics with the help and advice of enthusiastic volunteers. Pioneered by journalist Martine Postma in Amsterdam in 2009, hundreds of similar workshops take place across Europe. Nearly two-thirds of Europeans would rather repair their products than buy new ones. "We're a society of waste and overconsumption," says Emmanuel Vallée, organiser of the Repair Café Paris, which typically sees around 25 people attending per event, including some online, since it launched in May 2019. "We throw things away that we don't need to and buy new gadgets before exploring the possibility of repair. The cycle continues. It's a vicious circle.' For Vallée and repairers like him, there's a lot of work to be done. The world produced nearly 45 million tonnes of e-waste in 2016 as consumers and businesses threw out their old smartphones, computers and household appliances - material worth an estimated \$62.5bn. Only 20% was properly recycled. In Europe, where the problem is particularly acute, researchers estimate that only 12% to 15% of mobile phones are properly recycled - despite around 90% of the population owning one. E-waste, which is often shipped illegally from the West to sprawling, toxic dumpsites in countries like the Philippines, Ghana, Nigeria and China, is expected to grow to more than 52 million tonnes by the end of 2021, and to double by 2050 - making it the fastest growing type of domestic waste in the world. The environmental impact ranges from huge carbon emissions to pollution of water sources and food supply chains. But significant amounts of that waste could be avoided through repairs. According to a study, only 40% of electronics breakdowns in France are repaired. But surveys have found nearly two-thirds of Europeans would rather repair their products than buy new ones. French officials truly believe the current system is broken and needs to be fixed. In an effort to defuse this vast amount of avoidable waste, France's National Assembly last year voted to introduce an index of "reparability" ratings for appliances such as washing machines, lawnmowers, televisions and smartphones. In doing so, the French government hopes to increase the electronics repair rate to 60% within five years. SubQuestion No: 24 Q.24 Steps that can be taken to reduce E- waste are: A. Volunteers can help and guide people to repair goods. B. Buying repairable gadgets should be encouraged. C. 45 million tonnes of e-waste should be disposed of quickly. D. At least 20% of the electronic gadgets should be repaired. E. Recycling of gadgets and electronics goods should be pushed hard. Ans 🛛 🗙 1. B, C, E 🗙 2. B, D, E 🖋 3. A, B, E 🗙 4. A, C, D
