Question ID : 99836741316

Comprehension:

Read the following information carefully and answer the given questions.

By the mid 19th century, mass production of paper patterns, the emergence of the home sewing machine and the convenience of mail order catalogues brought fashionable clothing

into the American home. By the early 20th century, home economists working in extension and outreach programmes taught women how to use paper patterns to improve the fit and efficiency of new garments as well as how to update the existing ones. Teachers of home economics traditionally made home sewing a critical part of their curriculum, emphasising self sufficiency and resourcefulness for young women. However, with the increasing availability of mass produced clothing in catalogues and department stores, more and more women preferred buying garments to making them. As a result, home economists shifted their attention to consumer education. Through field study, analysis and research, they became experts on the purchase and preservation of ready to wear clothing for the family, offering budgeting instruction targeted at adolescent girls. Modern home sewing made it possible for American women to transcend their economic differences and geographic locations with clothing that increasingly standardised. The democratisation of fashion continued through the 20th century as the ready-to-wear market expanded and home sewing became more of a pastime than necessity.

SubQuestion No : 16

Q.16 Which of the following is the main focus of the passage?

- Ans**

However, with the increasing availability of mass produced clothing in catalogues and department stores, more and more women preferred buying garments to making them. As a result, home economists shifted their attention to consumer education. Through field study, analysis and research, they became experts on the purchase and preservation of ready to wear clothing for the family, offering budgeting instruction targeted at adolescent girls. Modern home sewing made it possible for American women to transcend their economic differences and geographic locations with clothing that increasingly standardised. The democratisation of fashion continued through the 20th century as the ready-to-wear market expanded and home sewing became more of a pastime than necessity.

Question ID : 99836741319

Comprehension:

Read the following information carefully and answer the given questions.

By the mid 19th century, mass production of paper patterns, the emergence of the home sewing machine and the convenience of mail order catalogues brought fashionable clothing into the American home. By the early 20th century, home economists working in extension and outreach programmes taught women how to use paper patterns to improve the fit and efficiency of new garments as well as how to update the existing ones. Teachers of home economics traditionally made home sewing a critical part of their curriculum, emphasising self sufficiency and resourcefulness for young women. However, with the increasing availability of mass produced clothing in catalogues and department stores, more and more women preferred buying garments to making them.
