**Que. 18** Read the passage given below and answer the questions that follow.

Fish are one of the most highly utilized and **intriguing** vertebrate taxa by humans; they are harvested from wild stocks as part of global fishing industries, grown under intensive aquaculture conditions, are the most common pet and are widely used for scientific research. But fish are seldom afforded the same level of compassion or welfare as warm-blooded vertebrates. Part of the problem is the large gap between people's perception of fish intelligence and the scientific reality. This is an important issue because public perception guides government policy. The perception of an animal's intelligence often drives our decision whether or not to include them in our moral circle.

From a welfare perspective, most researchers would suggest that if an animal is sentient, then it can most likely suffer and should therefore be offered some form of formal protection. There has been a debate about fish welfare for decades which centres on the question of whether they are sentient or conscious. The implications for affording the same level of protection to fish as other vertebrates are great, not least because of fishing-related industries. Here, the passage reviews the current state of knowledge of fish cognition starting with their sensory perception and moving on to cognition. The review reveals that fish perception and cognitive abilities are **abundant**, often matching or exceeding other vertebrates. A review of the evidence for pain perception strongly suggests that fish experience pain in a manner similar to the rest of the vertebrates. Although scientists cannot provide a definitive answer on the level of consciousness for any non-human vertebrate, the extensive evidence of fish behavioral and cognitive sophistication and pain perception suggests that best practice would be to lend fish the same level of protection as any other vertebrate.

Why are fish not afforded the same level of compassion as other vertebrates?

1. Fish live in water therefore they are not considered as vertebrates.
2. The wide variety of fish makes it impossible to offer compassion.
3. There is a large gap between people's perception of fish intelligence and scientific reality.
4. Fish are highly aggressive creatures that should be used only for food.
5. None of the above.

Correct Option - 3

---

**Que. 19** What helps humans to decide whether or not to include an animal in their moral circle?

1. The amount of loyalty that the animal is willing to show.
2. The visible aggressive nature of the animal.
3. Classification on the basis of taxonomy.
4. The perception of an animal's intelligence.
5. None of the above.

Correct Option - 4

---

**Que. 20** The debate about fish welfare is centered on?

1. The question of whether they are sentient or conscious.
2. The question of whether they have a moral circle or not.
3. The question of whether they are vertebrates or invertebrates.
4. All of the above
5. None of the above.

**Que. 89** **Direction:** Read the following information carefully and answer the question that follows:

Twelve persons are sitting in two parallel rows containing six person each in such a way that there is an equal distance between adjacent persons. In row-1 P, Q, R, S, T and U are seated and all of them are facing South. In row-2 A, B, C, D, E and F are seated and all of them are facing North. Therefore, in the given seating arrangement each member seated in a row faces another member in the other row.

Q sits at one of the end of the row. One person sits between P and Q. R sits opposite to D. A sits immediately right of D. Three persons sit between S and T and S does not sit at any end of the line. U is not an immediate neighbour of T. E sits opposite to S. C sits second to the right of B. Either B or C sits at end of the row. P does not face B and T does not face C. F sits second to the right of E.

Who sits at end of the row?

1. P
2. C
3. A
4. U
5. R

Correct Option - 3

---

**Que. 90** Who sits second to the right of U?

1. Q
2. S
3. P
4. T
5. R

Correct Option - 2

**Que. 98** **Directions:** In the following question assuming the given statements to be True, find which of the conclusion among given conclusions is / are definitely true and then give your answers accordingly.

**Statements:**  $U \leq W \geq R > S$  ;  $T > S = V$

**Conclusions:**

I.  $W < V$

II.  $T < V$

1. Only I is true
2. Only II is true
3. Either I or II is true
4. Neither I nor II is true
5. Both I and II is true

Correct Option - 4

---

**Que. 99** **Directions:** - In these Questions, Relationship between different elements is shown in the statements. These statements are followed by 2 Conclusions. Marks Answer as Option Given.

**Statement:**  $P \geq Q = R \geq N < S$

**Conclusions:**

I)  $S > Q$

II)  $P \geq N$

1. Only I follow
2. Only II follow
3. Both I and II follow

4. Either I or II follow
5. None follow
