**Que. 7** A passage is given below with five blanks labelled (A)-(E). Below the passage, five options are given for each blank. Choose the word that fits each blank most appropriately in the context of the passage, and mark the corresponding answer.

The end of World War II was not just the end of a war, but also the \_\_ (A) \_\_ of a tense and dynamic period that affected society on all levels. This "postwar" period, as it became known, shaped the world as we know it today; likewise, the period was shaped itself both by the war that had \_\_ (B) \_\_ it, and the powerful forces that surrounded it. As the energy of fundamentally different ideologies—Communism and Democracy—collided with

advances in science such as the nuclear bomb, a dangerous environment ensued that created an atmosphere of **(C)** throughout the world and especially, within America.

This atmosphere is known broadly as the “Cold War.” While the Cold War played out step-by-step between the United States and the Soviet Union, it was **(D)** playing out in the everyday lives of the masses within their borders. Paranoia, nevertheless, was not an effect that followed immediately after the close of the War. In fact, the United States had enjoyed an extended period of economic **(E)** during the war, and following the war, the U.S. economy continued with great strength for more than a decade.

**Que. 17** Read the passage given below and answer the questions that follow.

It is well **accorded** that COVID-19 extracts a huge toll on the mental health of patients and leaves behind a slew of neurological sequelae in its wake. However, what is alarming is the wide gamut of mental and neurological disorders seen even in those with milder symptoms. Such patients frequently reported being anxious, depressed and having difficulty in sleeping. A higher incidence of frank psychosis manifesting as disorganization of thought processes and personality disorders was also reported. Many survivors of COVID-19 had to battle substance abuse in its immediate aftermath. There was a steep increase in the amount of alcohol consumed by regular drinkers. Persons who had stopped smoking and consuming alcohol resumed their habit in disconcerting numbers.

The occurrence of neurodegenerative disorders like Parkinsonism is concerning as this would bring long-term disability in the form of impaired mobility and memory decline. It has been hypothesized that the causative mechanism for many of the neurological conditions due to COVID-19 may be the direct invasion of the nervous system by the virus, an increased tendency to blood clotting or an exaggerated immune response by the body. Various other factors like pre-existing psychiatric illness, prolonged quarantine, perceived lack of organizational support, and social stigma are risk factors. **Anxiety, Nervousness, and Post-traumatic stress disorder are often fuelled by fear of infecting other family members, physical distancing, loneliness, and \_\_\_\_\_ at home in cramped quarters.**

The pandemic has radically transformed the way businesses **function** and services delivered. Remote working disrupts a healthy-work life balance. Face to face contact and human interactions which were considered so essential for emotional well-being has taken a backseat. Lack of comforting physical contact like shaking hands and hugging friends is stressful and disconcerting. Online classes and home-schooling have placed a **gargantuan** burden both on students and parents. Lack of access to reliable computer hardware and spotty internet connections, particularly in rural areas and in the economically backward have created a new class divide. Children have been deprived of co-curricular activities, participation in group events and sports which is essential for their holistic development. Mental stress and fatigue have increased manyfold due to the rigours imposed by virtual learning.

Choose the most appropriate option to fill in the blank for the sentence given below.

Anxiety, Nervousness, and Post-traumatic stress disorder are often fuelled by fear of infecting other family members, physical distancing, loneliness, and \_\_\_\_\_ at home in cramped quarters.
