DDA JE

**Previous Year Paper
(JE CIVIL)
23 April 2018 Shift 2**

DDA JE (Civil & Elect) Exam

Participant ID:	
Participant Name:	
Test Center Name:	
Test Date:	23/04/2018
Test Time:	12:30 PM - 2:30 PM
Subject:	JE CIVIL

Section : Domain

Q.1 An angular reading having a whole circle bearing of $335^{\circ} 30'$ would be represented in quadrant form as:

Ans 1. N24 30E
 2. S24 30W
 3. S24 30E
 4. N24 30W

Question ID : 9497309472

Status : Answered

Chosen Option : 4

Q.2 The joints which are intended to create weakened planes in the concrete and regulate the location where cracks, resulting from dimensional changes will occur are called as:

Ans 1. Construction joints
 2. Hinge joints
 3. Contraction joints
 4. Isolation joints

Question ID : 9497309441

Status : Answered

Chosen Option : 3

Q.3 What is the limiting value of aggregate abrasion for concrete wearing courses?

Ans 1. 20
 2. 50
 3. 30
 4. 40

Question ID : 9497309510

Status : Answered

Chosen Option : 3

Q.4 If the measured Froude number for a hydraulic jump is 10, which type of jump is it?

Ans 1. Steady
 2. Oscillating
 3. Strong
 4. Weak

Question ID : 9497309497

Status : Answered

Chosen Option : 3

Q.5 Sewage sickness is a phenomenon related to:

Ans 1. stoppage of free circulation of air due to clogging of soil pores
 2. septic sewage disposal

Question ID : 9497309483

Status : Answered

Chosen Option : 4

3.

spoiling of vegetables due to application of sewage waste

4. malaria caused by sewage

Q.6 Which of the following is an obstacle to ranging but not chaining?

Ans 1. Hill
 2. River
 3. Pond
 4. Building

Question ID : 9497309471

Status : Answered

Chosen Option : 1

Q.7 A levelling operation is planned to be run across a river. Which of the following levelling operations shall be used for performing this?

Ans 1. Trigonometrical
 2. Fly
 3. Reciprocal
 4. Cross

Question ID : 9497309473

Status : Answered

Chosen Option : 1

Q.8 A component of an ocean wave energy (tidal energy) is to be constructed using reinforced cement concrete. Which of the following will be considered as the exposure condition for designing the structure?

Ans 1. Extreme
 2. Severe
 3. Moderate
 4. Very Severe

Question ID : 9497309434

Status : Answered

Chosen Option : 1

Q.9 Which of the following tests is used to estimate the soundness of ordinary portland cement?

Ans 1. Daval
 2. Le Chatelier
 3. Bogue's
 4. Blaine's

Question ID : 9497309446

Status : Answered

Chosen Option : 2

Q.10 A soil having sensitivity index of 5 will be classified as:

Ans 1. Sensitive
 2. Normal
 3. Quick
 4. Insensitive

Question ID : 9497309511

Status : Answered

Chosen Option : 1

Q.11 A soil is called as active, if its activity is:

Ans 1. < 1
 2. < 0.75
 3. > 1.4

Question ID : 9497309445

Status : Not Answered

Chosen Option : --

4. < 1.4

Q.12 Preston tube is used to measure:

Ans 1. boundary layer viscosity
 2. boundary shear stress
 3. mean flow velocity
 4. turbulent velocity profiles

Question ID : 9497309498

Status : Not Answered

Chosen Option : --

Q.13 Fillet weld material could fail in which of the following failure mechanisms?

Ans 1. Bearing
 2. Tension
 3. Shear
 4. Compression

Question ID : 9497309465

Status : Answered

Chosen Option : 3

Q.14 In Terzaghi's theory of one-dimensional consolidation, which of the following is NOT an assumption?

Ans 1. Soil is homogeneous.
 2. Darcy's law is not valid.
 3. Soil is incompressible.
 4. Soil is completely saturated.

Question ID : 9497309447

Status : Answered

Chosen Option : 2

Q.15 Which of the following is the most efficient and economical section used as a beam?

Ans 1. H section
 2. Pipe section (circular)
 3. Angles
 4. I section

Question ID : 9497309460

Status : Answered

Chosen Option : 4

Q.16 Which of the following types of soils, in general, will have the highest capillary rise of water?

Ans 1. Colloids
 2. Silts
 3. Clays
 4. Fine sand

Question ID : 9497309451

Status : Answered

Chosen Option : 4

Q.17 Which of the following is used to specify the size of a theodolite?

Ans 1. Diameter of the lower plate
 2. Diameter of the vertical circle
 3. Telescope length
 4. Diameter of the upper plate

Question ID : 9497309475

Status : Answered

Chosen Option : 1

Q.18 What is the maximum slenderness ratio allowed for structural steel members always under tension?

Ans 1. 350
 2. 300
 3. 250
 4. 400

Question ID : 9497309468

Status : Answered

Chosen Option : 1

Q.19 According to IS800, the modulus of elasticity, E ($E \times 10^5$ N/sq mm) of structural steel is assumed to be:

Ans 1. 3.00
 2. 2.00
 3. 2.50
 4. 1.50

Question ID : 9497309467

Status : Answered

Chosen Option : 2

Q.20 During surveying, the curvature of earth is taken into consideration only when the extent (m^2) of the survey is at least:

Ans 1. 200
 2. 260
 3. 160
 4. 100

Question ID : 9497309469

Status : Answered

Chosen Option : 2

Q.21 The standard penetration of VG40 as stipulated by the Indian standard is a minimum of:

Ans 1. 80.00
 2. 60.00
 3. 45.00
 4. 35.00

Question ID : 9497309504

Status : Not Answered

Chosen Option : --

Q.22 In which of the following fluids is the shear stress found to be directly proportional to the rate of angular deformations?

Ans 1. Dilatant
 2. Thixotropic
 3. Non-Newtonian
 4. Newtonian

Question ID : 9497309490

Status : Answered

Chosen Option : 4

Q.23 Usually, a plate girder is called as economical if it corresponds to minimum:

Ans 1. weight
 2. depth
 3. width
 4. web thickness

Question ID : 9497309463

Status : Answered

Chosen Option : 4

Q.24 Which of the following is NOT an advantage of plane table surveying?

Ans 1. Inaccessible point can be easily located by intersection.
 2.

Question ID : 9497309477

Status : Answered

Chosen Option : 4

Irregular areas and objects can be well represented.

- 3. It is suitable in magnetic areas.
- 4. Number of accessories required are small.

Q.25 What is the advantage of a pin connection?

Ans

- 1. The moment is zero.
- 2. It does not rust.
- 3. Easier workability.
- 4. Secondary stresses are usually negligible.

Question ID : 9497309461

Status : Answered

Chosen Option : 1

Q.26 On a pressure-voids ratio plot on semilog scale for a soil, the slope of the linear portion is referred as:

Ans

- 1. Compression index
- 2. Coefficient of volume change
- 3. Swelling index
- 4. Coefficient of compressibility

Question ID : 9497309454

Status : Answered

Chosen Option : 1

Q.27 What is the minimum dissolved oxygen limit (ppm) for sustaining aquatic life?

Ans

- 1. 64
- 2. 4
- 3. 2
- 4. 16

Question ID : 9497309486

Status : Answered

Chosen Option : 1

Q.28 An arch bridge having span length of 10.25 m is being constructed. The wearing course slab thickness is 325 mm. If the first arch is cast today, after how many days should the props be removed?

Ans

- 1. 7
- 2. 21
- 3. 14
- 4. 28

Question ID : 9497309435

Status : Answered

Chosen Option : 3

Q.29 According to the basic principles of contouring, which of the following is true?

Ans

- 1. The interval is directly proportional to the complexity of the geographical features.
- 2. The interval does not depend on the scale of the map or the complexity of the geographical features.
- 3. The interval is inversely proportional to the scale of the map.
- 4. The interval is directly proportional to the scale of the map.

Question ID : 9497309474

Status : Answered

Chosen Option : 3

Q.30 Which of the following conditions need to be applicable for uniform flow to take place in an open channel?

Ans

Question ID : 9497309496

1. Prismatic channel and constant depth flow
 2. Frictionless channel
 3. Prismatic channel
 4. Non-prismatic channel

Status : Answered
 Chosen Option : 1

Q.31 The ability of a material to permanently deform without breaking is called as:

Ans 1. Young's modulus
 2. Strain hardening
 3. Ductility
 4. Brittleness

Question ID : 9497309502
 Status : Answered
 Chosen Option : 2

Q.32 According to IS800, which of the following is NOT a limit state of durability consideration?

Ans 1. Brittle fracture
 2. Corrosion durability
 3. Fatigue crack
 4. Fire durability

Question ID : 9497309508
 Status : Answered
 Chosen Option : 4

Q.33 In steel design, a plate used for connecting two or more structural members intersecting each other is referred as:

Ans 1. Gusset plate
 2. Base plate
 3. Shoe plate
 4. Truss plate

Question ID : 9497309466
 Status : Answered
 Chosen Option : 1

Q.34 An aquifer has a porosity of 60% and the ratio of specific yield to specific retention is 1.5. What will be the specific yield (%)?

Ans 1. 24
 2. 48
 3. 36
 4. 12

Question ID : 9497309452
 Status : Not Answered
 Chosen Option : --

Q.35 According to the bearing capacity computations' theory, which of the following criteria are used for estimating the allowable bearing capacity of soils?

Ans 1. Settlement and plasticity
 2. Settlement and shear failure
 3. Soil structure interface failure
 4. Settlement and tensile failure

Question ID : 9497309457
 Status : Answered
 Chosen Option : 2

Q.36 What is the minimum nominal cover (mm) to be provided for reinforced concrete member exposed to severe weather conditions?

Ans 1. 50
 2. 35

Question ID : 9497309438
 Status : Answered
 Chosen Option : 1

- 3. 40
- 4. 45

Q.37 The blades of a fast centrifugal pump impeller will be:

Ans 1. propeller type
 2. radially spreading
 3. forward facing
 4. backward facing

Question ID : 9497309499

Status : Answered

Chosen Option : 2

Q.38 In sewage flow design, the velocity of flow of sewage is considered NOT to depend on:

Ans 1. grade of sewer
 2. roughness of sewer
 3. length of sewer
 4. hydraulic mean depth of sewer

Question ID : 9497309480

Status : Not Answered

Chosen Option : --

Q.39 In the process of chlorination of water, the application of chlorine beyond the stage of break point is termed as:

Ans 1. Double chlorination
 2. Break-point chlorination
 3. Post-chlorination
 4. Super-chlorination

Question ID : 9497309487

Status : Answered

Chosen Option : 4

Q.40 A flownet can be applied for all the listed purposes below EXCEPT:

Ans 1. determination of seepage pressure
 2. determination of seepage
 3. determination of electric charge carrying capacity
 4. determination of hydrostatic pressure

Question ID : 9497309453

Status : Not Answered

Chosen Option : --

Q.41 The high strength deformed bar reinforcement in either direction in slabs shall not be less than p percent of the total cross sectional area, where p is:

Ans 1. 0.18
 2. 0.10
 3. 0.15
 4. 0.12

Question ID : 9497309439

Status : Answered

Chosen Option : 4

Q.42 With which of the following curves are different grades usually joined together?

Ans 1. Reverse
 2. Transition

Question ID : 9497309476

Status : Answered

Chosen Option : 3

- 3. Vertical
- 4. Compound

Q.43 Usually for a group of piles, pile caps are provided for which of the following reasons?

Ans 1. Stop any infiltration of water from top
 2. Spread loads to all piles
 3. Arrest lateral displacement
 4.

Increase the load bearing capacity of each pile

Question ID : 9497309456

Status : Answered

Chosen Option : 2

Q.44 When a matter resists applied shear stress by static deformation, it is:

Ans 1. Solid
 2. Fluid
 3. Liquid
 4. Gas

Question ID : 9497309489

Status : Answered

Chosen Option : 3

Q.45 Castiglione's theorem represents which of the following methods?

Ans 1. Equilibrium
 2. Flexibility
 3. Displacement
 4. Force

Question ID : 9497309500

Status : Not Answered

Chosen Option : --

Q.46 Which of the following tests is NOT used for measuring the workability of concrete?

Ans 1. Compaction factor
 2. Slump
 3. March cone flow time
 4. Vebe

Question ID : 9497309433

Status : Answered

Chosen Option : 3

Q.47 Anaerobic working conditions are applicable to:

Ans 1. Sludge digestion tank
 2. Activated sludge digestion unit
 3. Sedimentation tank
 4. Trickling filters

Question ID : 9497309481

Status : Answered

Chosen Option : 2

Q.48 What will be the effective length of a steel column of length, s , having one end hinged and other fixed?

Ans 1. s
 2. $1.25s$

Question ID : 9497309459

Status : Answered

Chosen Option : 3

3. $0.8s$

4. $2s$

Q.49 What is the range of effective size of sand particles (mm) used in slow sand filters?

Ans 1. $0.25 - 0.35$

2. $0.45 - 0.55$

3. $0.35 - 0.45$

4. $0.15 - 0.25$

Question ID : 9497309485

Status : Not Answered

Chosen Option : --

Q.50 The volume (in millilitres) occupied by aerated mixed liquor containing one gram of dry solids after settling for 30 minutes is termed as:

Ans 1. Liquor index

2. Chlorination limit

3. Allowable solids content

4. Sludge Volume Index (SVI)

Question ID : 9497309478

Status : Answered

Chosen Option : 4

Q.51 A 5 ft by 6 ft footing is designed with water table at the base of the footing. As per the general bearing capacity equation, what would be the correction for water table?

Ans 1. 0.25

2. 1

3. 0.75

4. 0.5

Question ID : 9497309458

Status : Not Answered

Chosen Option : --

Q.52 As per IS-456, the unsupported length between end restraints shall not exceed m times the least lateral dimension of a column, where m is:

Ans 1. 20

2. 40

3. 30

4. 60

Question ID : 9497309437

Status : Answered

Chosen Option : 2

Q.53 Which equation usually gives the laminar flow for real fluid?

Ans 1. Bernoulli

2. Newton

3. Euler

4. Navier-Stokes

Question ID : 9497309495

Status : Answered

Chosen Option : 1

Q.54 According to IS 456, what is the partial safety factor for loads in case of limit state of collapse when dead and live loads are taken into account?

Ans 1. 0.90

2. 1.20

3. 1.00

4. 1.50

Question ID : 9497309442

Status : Answered

Chosen Option : 4

Q.55 For a triangular section, the ratio of moments of inertia about its base and about a centroidal axis parallel to its base, is:

Question ID : 9497309506

Ans 1. 1
 2. 4
 3. 3
 4. 2

Status : Answered
Chosen Option : 3

Q.56 Which of the following is NOT a method of laying water distribution pipelines?

Ans 1. Dead-end
 2. Grid-iron
 3. Radial
 4. Spiral

Question ID : 9497309488
Status : Answered
Chosen Option : 4

Q.57 Usually, the specific gravity of sewage is:

Ans 1. slightly less than one
 2. one
 3. slightly greater than one
 4. much less than one

Question ID : 9497309479
Status : Answered
Chosen Option : 3

Q.58 The difference between the total head line and the hydraulic grade line is the:

Ans 1. piezometric head
 2. pressure head
 3. velocity head
 4. elevation head

Question ID : 9497309493
Status : Answered
Chosen Option : 3

Q.59 For a simply supported beam, if the original depth and width are doubled, the deflection at the centre will:

Ans 1. decrease by 25%
 2. increase by 6.25%
 3. decrease by 6.25%
 4. decrease by 12.5%

Question ID : 9497309501
Status : Answered
Chosen Option : 4

Q.60 Per the IS, what is the minimum number of rivets essential at each end?

Ans 1. 5
 2. 2
 3. 4
 4. 3

Question ID : 9497309464
Status : Answered
Chosen Option : 4

Q.61 As per IS 800, the maximum pitch of rivets in compression member of thickness t is lesser of:

Ans 1. 200 mm or $12t$
 2. 200 mm or 20t

Question ID : 9497309462
Status : Answered
Chosen Option : 1

- 3. 300 mm or $24t$
- 4. 300 mm or $32t$

Q.62 A clay having an unconfined compressive strength of 160 kN/sq.m would be classified as:

Ans 1. Soft
 2. Very Stiff
 3. Stiff
 4. Hard

Question ID : 9497309509

Status : Not Answered

Chosen Option : --

Q.63 An 8 m simply supported reinforced concrete beam is to be checked for deflection. What will be the limiting ratio of span to effective depth?

Ans 1. 7
 2. 20
 3. 14
 4. 26

Question ID : 9497309436

Status : Answered

Chosen Option : 2

Q.64 Fly ash is added to concrete to improve all of the following properties EXCEPT:

Ans 1. Permeability
 2. Workability
 3. Long term strength
 4. Early age strength gain

Question ID : 9497309432

Status : Answered

Chosen Option : 3

Q.65 The limiting value of water absorption (%) for a class 25 brick as specified in the Indian standard is:

Ans 1. 10
 2. 20
 3. 15
 4. 25

Question ID : 9497309505

Status : Answered

Chosen Option : 2

Q.66 According to IS 456, nominal concrete mixes can be used up to what grade of concrete?

Ans 1. M10
 2. M15
 3. M20
 4. M5

Question ID : 9497309443

Status : Answered

Chosen Option : 3

Q.67 If the coefficient of uniformity of a soil is 16 and the coefficient of curvature is 1, then what is the ratio $D60/D30$?

Ans 1. 4.0
 2. 3.0
 3. 1.0
 4. 2.0

Question ID : 9497309450

Status : Answered

Chosen Option : 1

Q.68 A soil when tested in a laboratory indicated a liquid limit of 70% and a plasticity index of 40%. What is the type of the soil?

Ans

Question ID : 9497309444

- 1. CH
- 2. CL
- 3. ML
- 4. OL

Status : Not Answered
Chosen Option : --

Q.69 The compactive energy (kJ/cum) used for modified Proctor test is approximately equal to:

Ans

- 1. 2675
- 2. 595
- 3. 1250
- 4. 1856

Question ID : 9497309455
Status : Not Answered
Chosen Option : --

Q.70 What are the dimensions of surface tension?

Ans

- 1. ML^{-1}
- 2. MT^{-2}
- 3. MLT
- 4. ML

Question ID : 9497309494
Status : Answered
Chosen Option : 2

Q.71 Which of the following represents biochemical treatments of sewage effluents?

Ans

- 1. Oxidation
- 2. Redox
- 3. Sulphonification
- 4. Chlorination

Question ID : 9497309482
Status : Answered
Chosen Option : 1

Q.72 Beams composed of two materials and rigidly connected together so as to behave as one piece, are known as:

Ans

- 1. Parallel beams
- 2. Determinate beams
- 3. Composite beams
- 4. Indeterminate beams

Question ID : 9497309507
Status : Answered
Chosen Option : 3

Q.73 Aneroid barometers are used for measuring which of the following pressures?

Ans

- 1. Differential w.r.t. atmospheric
- 2. Standard atmospheric
- 3. Gauge
- 4. Local atmospheric

Question ID : 9497309491
Status : Not Answered
Chosen Option : --

Q.74 For Bernoulli's equation to remain valid, which of the following is NOT required?

Ans

- 1. Incompressible medium
- 2. Steady flow

Question ID : 9497309492
Status : Answered
Chosen Option : 3

- 3. Irrotational flow
- 4. Ideal gas fluid

Q.75 The maximum voids ratio of a soil is 0.7 and the minimum is 0.35. If the natural voids ratio is 0.525, then what will be the density index?

Ans

- 1. 0.5
- 2. 2
- 3. 1
- 4. 1.5

Question ID : 9497309449

Status : Answered

Chosen Option : 3

Q.76 The pH value of water to be used for concrete making shall not be usually less than:

Ans

- 1. 5.0
- 2. 6.0
- 3. 7.0
- 4. 8.0

Question ID : 9497309448

Status : Answered

Chosen Option : 2

Q.77 The phenomenon of internal cracking (separation of fibres) in timber due to drying stresses is called as:

Ans

- 1. Honeycombing
- 2. Internal stressing
- 3. Hearting
- 4. Hardwood formation

Question ID : 9497309503

Status : Answered

Chosen Option : 2

Q.78 Which of the following mostly causes acidity?

Ans

- 1. Oxygen
- 2. Nitrogen
- 3. Hydrogen
- 4. Carbon dioxide

Question ID : 9497309484

Status : Answered

Chosen Option : 4

Q.79 According to the basic principles of errors, if n observations are made, then the accidental errors are proportional to:

Ans

- 1. n^2
- 2. $n^{0.5}$
- 3. $n^{0.75}$
- 4. $n^{-0.5}$

Question ID : 9497309470

Status : Answered

Chosen Option : 2

Q.80 What is the minimum number of longitudinal bars to be provided in a column of diameter 350 mm?

Ans

- 1. 8
- 2. 6
- 3. 4
- 4. 10

Question ID : 9497309440

Status : Answered

Chosen Option : 2

Section : Reasoning

Q.1 College and Temple are located to the West and South of the Library respectively. Book shop is to the North of the College. The distance of the Book shop from the College is equal to the distance of the Temple from the Library. Find the direction of the book shop with reference to the Library.

Ans 1. North-west
 2. West
 3. South-west
 4. North

Question ID : 9497309518

Status : Answered

Chosen Option : 1

Q.2 D is the brother of V. R is the sister of S. V is the son of R. How is D related to R?

Ans 1. Husband
 2. Father
 3. Brother
 4. Son

Question ID : 9497309512

Status : Answered

Chosen Option : 4

Q.3 Find the value of 'k' in the given table.

48	26	15
56	30	k
72	38	21

Question ID : 9497309519

Status : Answered

Chosen Option : 3

Ans 1. 28
 2. 31
 3. 17
 4. 23

Q.4 Based on the given analogy, determine the missing word.

Meeting : Agenda :: Election : ?

Ans 1. Booth
 2. Vote
 3. Manifesto
 4. Rally

Question ID : 9497309514

Status : Answered

Chosen Option : 3

Q.5 Find the related number to complete the analogy.

290 : 17 :: 170 : ?

Ans 1. 13
 2. 16
 3. 14
 4. 9

Question ID : 9497309513

Status : Answered

Chosen Option : 1

Q.6 In a group of 95 persons, 45 like trekking, 35 like swimming and 30 do not like either of the two. How many like both trekking and swimming?

Ans 1. 15
 2. 25
 3. 10
 4. 20

Question ID : 9497309520

Status : Answered

Chosen Option : 1

Q.7 A statement followed by some conclusions is given below.

Statement: Grandparents lament that food available these days is not as good as it used to be in their time.
Conclusions: I. They may be nostalgic.
II. They lament over the deterioration in the quality of food over the period.

Which of the given conclusions logically follows(s) from the given statement?

Ans 1. Neither I nor II follows.
 2. Only conclusion II follows.
 3. Both I and II follow.
 4. Only conclusion I follows.

Question ID : 9497309521

Status : Answered

Chosen Option : 2
