Read the given passage and answer the question that follows.

In the heart of the ancient forest, a hidden waterfall tumbled gracefully down the rugged cliffs. The forest, untouched by time, was a sanctuary for a myriad of plant and animal species. The tranquil sound of water cascading into a clear pool below created a soothing symphony that echoed through the trees. The waterfall's pool was a gathering place for both creatures of the land and those of the sky. Birds would visit to quench their thirst, and deer would cautiously approach to drink from its pristine waters. The waterfall's surroundings were adorned with vibrant wildflowers that added splashes of colour to the lush greenery. Moss-covered rocks provided a comfortable resting spot for various forest critters, and the gentle rustling of leaves carried a sense of serenity that enveloped the area. As the sun dappled through the dense canopy, the waterfall seemed to shimmer with a magical glow, casting rainbows in the mist that rose from its base. It was a place of harmony, where the cycle of life played out in a delicate balance. The waterfall symbolised the timeless beauty of nature and the importance of preserving such treasures for generations to come.

Olympic Games, an athletic festival that originated in ancient Greece, was revived in the late 19th century. Before the 1970s, the Games were officially limited to competitors with amateur status, but in the 1980s many events were opened to professional athletes. Currently, the Games are open to all, even to the top professional athletes in basketball and football (soccer). The ancient Olympic Games included several of the sports that are now part of the Summer Games program, which at times has included events in as many as 32 different sports. In 1924, the Winter Games were sanctioned for winter sports. The Olympic Games have come to be regarded as the world's foremost sports competition.

Just how far back in history organised athletic contests were held remains a matter of debate, but it is reasonably certain that they occurred in Greece almost 3,000 years ago. Of all the games held throughout Greece, the Olympic Games were the most famous. Held every four years between 6 August and 19 September, they occupied such an important place in Greek history that in late antiquity historians measured time by the interval between them—an Olympiad. The Olympic Games, like almost all Greek games, were an intrinsic part of a religious festival. They were held in honour of Zeus at Olympia by the city-state of Elis in the north-western Peloponnese. The first Olympic champion listed in the records was Coroebus of Elis, a cook, who won the sprint race in 776 BCE. Notions that the Olympics began much earlier than 776 BCE are founded on myth, not historical evidence. According to one legend, for example, the Games were founded by Heracles, son of Zeus and Alcmene.

Q.1 In the following number-pairs, the second number is obtained by performing certain mathematical operations on the first number. Which numbers should replace X and Y so that the pattern followed by the two numbers on the left side of :: is the same as that on the right side of :: ?

(NOTE: Operations should be performed on the whole numbers, without breaking down the numbers into its constituent digits. E.g. 13 – Operations on 13 such as adding/subtracting/multiplying etc. to 13 can be performed. Breaking down 13 into 1 and 3 and then performing mathematical operations on 1 and 3 is not allowed.)

X : 81 :: 7 : Y

- Ans
- ☐ 1. X = 3, Y = 49
 - ☐ 2. X = 9, Y = 343
 - ☐ 3. X = 3, Y = 7
 - ☒ 4. X = 9, Y = 49

Q.6 In the following number pairs, the second number is obtained by applying certain mathematical operations to the first number. Which numbers should replace X and Y so that the pattern followed by the two numbers on the left side of :: is the same as that on the right side of ::?
(NOTE: Operations should be performed on the whole numbers, without breaking down the numbers into its constituent digits. E.g. 13 – Operations on 13 such as adding /subtracting /multiplying etc. to 13 can be performed. Breaking down 13 into 1 and 3 and then performing mathematical operations on 1 and 3 is NOT allowed)
 $X : 61 :: 8 : Y$

- Ans
- ☒ 1. X = 5, Y = 169
 - ☒ 2. X = 5, Y = 189
 - ☒ 3. X = 7, Y = 166
 - ☒ 4. X = 8, Y = 128
