Q.No.4. Translate the English passage into Odia.

[15]

Electricity is the life force of modern world. The use of electricity in daily life at all levels is too expensive to be enumerated. Electric power has transformed human life into an amazing experience of convenience, luxury, comfort and incredible ease. A great power became the slave of a human finger's push. Push to a button brings the light on and the same act sets hundreds of thousands of gadgets in action. The electricity revolutionized our houses, drawing rooms and kitchen with useful implements. It created wonders of entertainment like cinema, radio, TV, VCD, DVD and other audio-video systems. Even the computers won't work any wonders without the electricity. Today, the progress of a society or a nation or economy is so dependent on electric power that all the power generating resources and options are being exploited or explored. Oil, coal, water, air, sun light, tidal waves and atomic phenomena are being used for power generation. The oil and coal are non-renewable resources. Solar energy is yet costly to harness. The wind energy too has limitations. The tidal wave processes are yet at an experimental stage. Conventional atomic energy clearly is the best pollution-free option but it entails the tricky problem of atomic waste disposal.

Q.No.5: Write a summary of the following passage with an appropriate title.

[20]

Meditation is a practice that focuses the mind on a specific object, thought or activity to train attention and awareness. It has been shown to have many benefits for physical and mental health, including reducing stress and anxiety, improving sleep, and increasing feelings of calmness and relaxation. Studies have also shown that meditation can have positive effects on the brain, including increasing grey matter density in areas associated with learning and memory and decreasing grey matter density in the amygdala, an area of the brain involved in processing stress fear. Despite the many benefits of meditation, it can be intimidating for those who have never tried it before. However, there are many easy and accessible ways to get started, such as finding a guided meditation app or joining a meditation group.
