Q.184 Which of the following statements is INCORRECT with respect to the filling of orbitals in the ground state of an atom?

Ans ☒ 1.

Electron pairing in any orbital is not possible until all the available orbitals of a given subshell contain one electron each.

☒ 2.

Electrons prefer to enter those subshells which thereby, get either completely filled or just half filled.

☒ 3. An orbit cannot contain more than two electrons.

☒ 4. The electrons enter the various orbitals in decreasing order.
