Q.181 Which of the following statements is inconsistent with reference to learning by discovery?

- Ans 1. The learning method encourages students to discover facts, correlation and new knowledge based on their previous experiences and knowledge.
 2. In discovery learning, students manipulate structure and transfer information in order to solve old algebraic identities and information.
 3. In discovery learning, students are encouraged to learn concepts and principles through their own active involvement and to use thinking skills to solve problems independently.
 4. Discovery learning is a teaching strategy that can help students discover and learn scientific concepts by themselves through their active participation in the learning process.
