Status : Answered

Chosen Option : 2

Q.41 When a number is divided by 4 gives the remainder is 3. So the obtained quotient is divided by 5, leaves remainder 3. Now the quotient so obtained when divided by 6, leaves the remainder 5. The last quotient is 7 then the number is

Ans  1. 954  
 2. 950  
 3. 955  
 4. 1,063

Question ID : 63068040942

Status : Answered

Chosen Option : 3

Q.42 Simplify the following using BODMAS rule.

$$\frac{3}{4} + \frac{5}{2} \left[ \frac{1}{4} \times \left( \frac{2}{5} - \frac{4}{3} \right) \right]$$

Ans  1.  $\frac{1}{3}$   
 2. 1  
 3.  $\frac{1}{6}$   
 4.  $\frac{1}{2}$

Question ID : 63068026948

Status : Answered

Chosen Option : 3

Q.43 The least number which when divided by each of 14, 16, 24 and 40 leaves a remainder of 6 is \_\_\_\_\_.

Ans  1. 1760  
 2. 1686  
 3. 1700  
 4. 1428

Question ID : 63068046871

Status : Answered

Chosen Option : 2

Q.44 Find the value of the mathematical expression  $13 - [13 - \{13 - (13 - 13 - 13)\}]$ .

Ans  1. 1  
 2. 26  
 3. 0  
 4. 13

Question ID : 63068041131

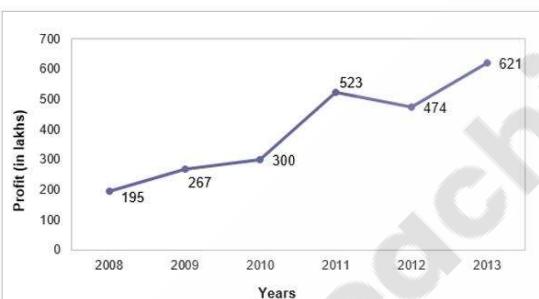

Status : Answered

Chosen Option : 2

Q.45 The line graph given below shows the profit (in lakh rupees) earned by a company over the period of 6 years.

Note: Income = Expenditure + Profit

If the income of the company in 2008 is Rs. 345 lakh and expenditure of the company in 2011 is Rs. 77 lakh, then find the ratio of expenditure in 2008 to the total income in 2011.

Ans  1. 1:2  
 2. 1:4  
 3. 2:5

Status : Answered

Chosen Option : 2

**Comprehension:**

After getting his start as a vaudeville performer, Charlie Chaplin turned his sights toward filmmaking during the silent era, effectively becoming one of the first "movie stars" in cinematic history. But his contribution to what would become the star system wasn't the only thing Chaplin did to change the film industry.

Silent era comedies were full of prat falls, sight gags, and the classic "slipping on a banana peel" slapstick. Cinema icons Buster Keaton and Harold Lloyd built their careers upon this slapstick form of comedy, but where Chaplin differs is how his brand of comedy affected audiences on a psychological level.

There are many different theories of humour from philosophers, but the one that seems to make the most sense within the context of silent era slapstick comedy is that of English philosopher Thomas Hobbes' "superiority theory". It suggests that humans take delight in other people's misfortunes as a way to feel superior. We laugh at the muscle-bound dude who slips and falls in front of his date, because he's big and we're not. We laugh at the bumbling crooked cop who accidentally cuffs himself to a radiator, because he has power and we don't.

However, this wasn't the case for Chaplin's iconic character, The Tramp. Instead, he made audiences laugh because they related to his suffering, and laughter. The way Chaplin incorporated tragedy into his comedies gave audiences someone they could truly identify with as they struggled to survive the Great Depression.

Chaplin's comedic explorations into the human condition transformed comedies, from a mere novelty into a poetic art form. His films were able to address real issues in a way that made them easier to talk about. They were funny because The Tramp wore big shoes and a tiny jacket, but they were great because he was too impoverished to afford anything else—something audiences could really understand.

It makes one of Chaplin's most famous quotes more poignant than ever: "Life is a tragedy when seen in close-up, but a comedy in long-shot."

**SubQuestion No : 106**

**Q.106 Which of the following would be the most suitable title for the above passage?**

Ans  1. The comic genius of Charlie Chaplin  
 2. Success of slapstick comedy  
 3. Superiority theory of Humour  
 4. Surviving the Great Depression
