Previous Year Paper

2nd Jan 2023

Uttar Pradesh Metro Rail Corporation Limited

उत्तर प्रदेश मेट्रो रेल कॉर्पोरेशन लिमिटेड

A joint Venture of Govt. of India and Govt. of Uttar Pradesh

Participant ID	
Participant Name	
Test Center Name	
Test Date	02/01/2023
Test Time	1:30 PM - 3:30 PM
Subject	Jr Engineer Civil

Section : Domain Knowledge

Q.1 Which of the following methods is used to measure the pH value of water?

- Ans A. Electro magnetic method
 B. Electrometric method
 C. Reverse osmosis method
 D. Distillation method

Question ID : 486324786

Status : Answered

Chosen Option : B

Q.2 Soils, in which rate of rock decomposition is greater than the rate of erosion or transportation, is best known as:

- Ans A. alluvial soil
 B. residual soil
 C. lacustrine soil
 D. transported soil

Question ID : 486324738

Status : Answered

Chosen Option : B

Q.3 Which of the following compaction equipment is predominantly used to compact granular soils of shallow depth?

- Ans A. Smooth wheel roller
 B. Pneumatic – tyred rollers
 C. Sheep foot roller
 D. Vibratory rollers

Question ID : 486324747

Status : Answered

Chosen Option : A

Q.4 Sand dunes are predominantly formed by:

- Ans A. marine soils
 B. alluvial soils
 C. aeolian soil deposits
 D. glacial soils

Question ID : 486324742

Status : Answered

Chosen Option : C

Q.5 In Bernoulli's equation, the total energy of a flowing liquid per unit weight is expressed as:

- Ans A. $(v^2/2g)$
 B. $Z + h + (v^2/2g)$
 C. $Z - h - (v^2/2g)$
 D. $Z^2 + h^2 + (v^2/2g)$

Question ID : 486324766

Status : Answered

Chosen Option : B

Q.6 Which of the following soil would exhibit the highest shrinkage swelling potential?

- Ans A. Clay
 B. Gravels
 C. Silts
 D. Sands

Question ID : 486324744

Status : Answered

Chosen Option : A

Q.7 The loss of head at the front of a pipe can be expressed as:

- Ans A. $(kv^2/2lg)$
 B. $5 * (v^2/2mg)$
 C. $0.7 * (kv^2/2lg)$
 D. $0.5 * (v^2/2g)$

Question ID : 486324763

Status : Answered

Chosen Option : D

Q.8 If the time required to close a valve of a pipe is greater than $2L/C$ (where L is the length of the pipe and C is the velocity of the pressure wave produced due to water hammer), then the valve closure is said to be:

- Ans A. zero
 B. constant
 C. sudden
 D. gradual

Question ID : 486324764

Status : Answered

Chosen Option : D

Q.9 A pipe through which water is flowing has diameter 200 mm and 100 mm at C/S 1 and 2, respectively. The velocity of water at Section 1(v1) is 4 m/s. The velocity heads at Sections 1 and 2 are determined as:

- Ans A. 0.269 m and 33.04 m, respectively
 B. 0.815 m and 83.04 m, respectively
 C. 0.50 m and 50.04 m, respectively
 D. 0.25 m and 100.09 m, respectively

Question ID : 486324771

Status : Answered

Chosen Option : B

Q.10 The data obtained from the process of levelling is useful ____.

- Ans A. to work out the elevations of the given points relative to each other
 B. to find included angles
 C. to determine the height of instruments
 D. to find linear and angular measurements

Question ID : 486324731

Status : Answered

Chosen Option : C

Q.11 The empirical formula which is NOT used in calculating the fire demand of a city is:

- Ans A. Kuichling's formula
 B. Cutter's formula
 C. Buston's formula
 D. Freeman's formula

Question ID : 486324778

Status : Answered

Chosen Option : B

Q.12 The optimum water content of "fat clay" generally lies between:

- Ans A. 5 and 10%
 B. 15 and 20%
 C. 10 and 15%
 D. 20 and 25%

Question ID : 486324749

Status : Answered

Chosen Option : B

Q.13 The classification of the system of sanitation which does NOT come under the water carriage system is the:

- Ans A. combined system
 B. partially separate system
 C. separate system
 D. conservancy system

Question ID : 486324790

Status : Answered

Chosen Option : D

Q.14 The cross-section method of contouring is useful for the survey of _____.

- Ans A. roads, railways and canals
 B. hill areas
 C. small open areas
 D. small closed areas

Question ID : 486324735

Status : Answered

Chosen Option : A

Q.15 In case of a circular sewer section, when it is running half full, its velocity will be:

- Ans A. 0.75 times the velocity when it was running full
 B. 0.50 times the velocity when it was running full
 C. equal to the velocity when it was running full
 D. 0.25 times the velocity when it was running full

Question ID : 486324787

Status : Answered

Chosen Option : D

Q.16 Hard board is an example of:

- Ans A. particle board
 B. block board
 C. chip board
 D. fibre board

Question ID : 486324714

Status : Answered

Chosen Option : B

Q.17 Float arrangement is provided in case of:

- Ans A. plate valves
 B. pressure relief valves
 C. non return valves
 D. air relief valves

Question ID : 486324788

Status : Answered

Chosen Option : D

Q.18 In a retaining wall retaining dry, cohesionless soil, the angle between the failure planes (slip planes) and horizontal, under active state, would be:

- Ans A. $0.66 \phi'$
 B. ϕ'
 C. $45^\circ + (\phi'/2)$
 D. $0.33 \phi'$

Question ID : 486324753

Status : Answered

Chosen Option : C

Q.19 The diameter of a pipe at Sections 1 and 2 is 10 cm and 15 cm, respectively. What is the discharge through the pipe if the velocity of water flowing through the pipe at Section 1 is 5 m/s?

- Ans A. $0.0628 \text{ m}^3/\text{s}$
 B. $0.1139 \text{ m}^3/\text{s}$
 C. $0.03927 \text{ m}^3/\text{s}$
 D. $0.1767 \text{ m}^3/\text{s}$

Question ID : 486324768

Status : Answered

Chosen Option : C

Q.20 Which of the following is NOT an objective of sewage disposal?

- Ans A. To elevate groundwater table level
 B. To prevent breeding of mosquitoes
 C. To dispose sewage after giving suitable treatment
 D. To prevent decomposition of wastage

Question ID : 486324776

Status : Answered

Chosen Option : A

Q.21 Which principle of surveying is useful to prevent accumulation of errors?

- Ans A. Whole to part
 B. Part to whole
 C. Right to left
 D. Left to right

Question ID : 486324718

Status : Answered

Chosen Option : A

Q.22 If a closed traverse consists of five sides, then the summation of all the included angles must be _____.
_____.

- Ans A. 540°
 B. 720°
 C. 900°
 D. 360°

Question ID : 486324726

Status : Answered

Chosen Option : A

Q.23 Which of the following statements is related to the water carriage system of sanitation?

- Ans A. No chance of putrefaction
 B. Large area of land is required for disposal of untreated sewage
 C. Lot of foul smell
 D. Risk of spread of an epidemic

Question ID : 486324782

Status : Answered

Chosen Option : A

Q.24 Read the given statements and select the most appropriate option regarding refractoriness.

Statement 1: Refractoriness denotes the ability of a material to withstand prolonged action of high temperature without melting or losing shape.

Statement 2: Materials resisting prolonged temperatures of 1580°C or more are known as refractory.

- Ans A. Both the statements are true
 B. Statement 1 is true, but statement 2 is false
 C. Both the statements are false
 D. Statement 1 is false, but statement 2 is true

Question ID : 486324703

Status : Not Answered

Chosen Option : --

Q.25 The phenomena of "Bulking of sand" would be most pronounced in:

- Ans A. coarse sand
 B. medium sand
 C. sandy gravel
 D. fine sand

Question ID : 486324746

Status : Answered

Chosen Option : D

Q.26 The density of the liquid _____ during most ordinary conditions of temperature, whereas the density of the gas _____ as the temperature changes.

- Ans A. increases; decreases
 B. is constant; changes
 C. changes; remains constant
 D. decreases; increases

Question ID : 486324755

Status : Answered

Chosen Option : D

Q.27 The RL of point B, which is on the ceiling, is 105.00 m and the foresight reading at B is 2.00 m. If the backsight reading at point A is 3.0 m at the floor, what is the RL of A?

- Ans A. 99.71 m
 B. 94.80 m
 C. 100.00 m
 D. 100.29 m

Question ID : 486324733

Status : Answered

Chosen Option : C

Q.28 If the magnetic bearing of the Sun at a place at noon in the Southern Hemisphere is 180° , the magnetic declination at that place is:

- Ans A. 0°
 B. $23^\circ S$
 C. $13^\circ E$
 D. $77^\circ N$

Question ID : 486324732

Status : Answered

Chosen Option : A

Q.29 Soil deposits, which are formed by landslides are called:

- Ans A. colluvium
 B. alluvial soils
 C. residual soils
 D. peats

Question ID : 486324736

Status : Answered

Chosen Option : A

Q.30 The defect observed as spongy swollen mass over the surface of burned bricks that is caused due to the presence of excess carbonaceous matter and sulphur in brick-clay is:

- Ans A. chuffs
 B. spots
 C. black core
 D. bloating

Question ID : 486324717

Status : Answered

Chosen Option : D

Q.31 Which survey line gives the details of offset?

- Ans A. Base line
 B. Chain line
 C. Tie line
 D. Main survey line

Question ID : 486324720

Status : Answered

Chosen Option : C

Q.32 The function of a reflux valve in a water distribution system is:

- Ans A. to maintain continuous flow of water
 B. to prevent the blockage of water in a pipeline
 C. to allow water to flow in one direction only
 D. to relieve high pressure of water in a pipeline

Question ID : 486324780

Status : Answered

Chosen Option : C

Q.33 Vorticity is _____ times the value of rotation.

- Ans A. 20
 B. 2
 C. 4
 D. 15.5

Question ID : 486324760

Status : Answered

Chosen Option : B

Q.34 In a water distribution system, hydrants are provided for:

- Ans A. storing purpose
 B. fire extinguishing purpose
 C. sampling purpose
 D. drinking purpose

Question ID : 486324789

Status : Answered

Chosen Option : B

Q.35 Most probable number is the unit to measure the:

- Ans A. hardness of water
 B. smell of water
 C. taste of water
 D. coliform bacterial density in water

Question ID : 486324785

Status : Answered

Chosen Option : D

Q.36 Which of the following factors does NOT significantly affect the compaction of soil?

- Ans A. Moisture content of soil
 B. Method of compaction
 C. Temperature
 D. Type of soil

Question ID : 486324745

Status : Answered

Chosen Option : C

Q.37 The type of levelling in which the level is set up at several suitable positions and staff readings are taken till the last sighted point is known as _____.

- Ans A. fly levelling
 B. differential levelling
 C. simple levelling
 D. profile levelling

Question ID : 486324734

Status : Answered

Chosen Option : D

Q.38 The pressure which is measured by using instrumentation, considering the atmosphere pressure as datum, is termed as:

- Ans A. absolute pressure
 B. vacuum pressure
 C. gauge pressure
 D. maximum pressure

Question ID : 486324758

Status : Answered

Chosen Option : C

Q.39 If one of the angles in a triangle measures less than 30° , is it a well-defined triangle?

- Ans A. It should always be 60°
 B. Yes
 C. No
 D. A triangle is always well-defined for any angle

Question ID : 486324719

Status : Answered

Chosen Option : C

Q.40 Weight density of a fluid is the ratio of _____.

- Ans A. specific volume to density
 B. specific gravity to density
 C. mass of the fluid to its volume
 D. weight of the fluid to its volume

Question ID : 486324754

Status : Answered

Chosen Option : D

Q.41 In a water distribution system, the domestic water demand to be considered as per IS:1172-1963 is:

- Ans A. 100 litres/capita/day
 B. 125 litres/capita/day
 C. 115 litres/capita/day
 D. 135 litres/capita/day

Question ID : 486324773

Status : Answered

Chosen Option : D

Q.42 The water distribution system which requires a large number of scour valves is the:

- Ans A. radial system
 B. grid iron system
 C. ring system
 D. dead end system

Question ID : 486324772

Status : Answered

Chosen Option : D

Q.43 In timber, the defects due to abnormal growth are:

- Ans A. warpage
 B. shakes, knots
 C. splitting
 D. excessive slope of grains

Question ID : 486324712

Status : Answered

Chosen Option : B

Q.44 For a normally consolidated coarse grained soil, the effective angle of internal friction was obtained as 30° . Its coefficient of lateral earth pressure at rest (K_0) would be nearest to:

- Ans A. 0.75
 B. 0.50
 C. 0.15
 D. 0.30

Question ID : 486324752

Status : Answered

Chosen Option : B

Q.45 In the method of working from whole to part, the main control point is located with:

- Ans A. lower precision
 B. randomly
 C. higher precision
 D. without measurement

Question ID : 486324721

Status : Answered

Chosen Option : C

Q.46 The resultant velocity of a fluid particle at (2, 1, 3) at time t = 1 for the velocity vector $4x^3i - 10x^2yj + 2tk$ is determined as (fluid flow) _____.

- Ans A. 253.24 units
 B. 2561.21 units
 C. 25.89 units
 D. 51.26 units

Question ID : 486324769

Status : Not Answered

Chosen Option : --

Q.47 Which of the following statements is related to the conservancy system of sanitation?

- Ans A. Small area is required for the disposal of treated sludge
 B. Less initial cost and high running cost
 C. Labour force is negligibly small
 D. No chance of putrefaction

Question ID : 486324775

Status : Not Answered

Chosen Option : --

Q.48 Which of the following is a characteristic of contour?

- Ans A. A contour is not necessarily a closed curve.
 B. Two contours of different elevations do not cross each other except in case of an overhanging cliff.
 C. Contours have sharp turning.
 D. A contour represents a ridge line if the concave side of the lower-value contour lies towards the higher-value contour.

Question ID : 486324730

Status : Answered

Chosen Option : B

Q.49 Which of the following statements regarding the common characteristics of building materials under stress is INCORRECT?

- Ans A. Stiff materials have a high modulus of elasticity permitting small deformation for a given load.
 B. Brittle materials have high plasticity.
 C. Ductile materials can be drawn out without necking down, the examples being copper and wrought iron.
 D. Flexible materials on the other hand have low modulus of elasticity and bend considerably without breakdown.

Question ID : 486324705

Status : Answered

Chosen Option : B

Q.50 According to Pascal's law, the intensity of pressure of a static fluid at a point is _____ in all the directions.

- Ans A. unequal
 B. zero
 C. maximum
 D. equal

Question ID : 486324756

Status : Answered

Chosen Option : D

Q.51 The theoretical detention time for a continuous flow settling tank in drinking water works will be:

- Ans A. Rate of flow of water / Capacity of the settling tank
 B. Rate of flow of water / Flow area of cross section
 C. Rate of flow of water / Depth of water in the settling tank
 D. Capacity of the tank / Rate of flow of water

Question ID : 486324784

Status : Answered

Chosen Option : D

Q.52 Which of the following artificial stones is manufactured by blending silica soda with cement to provide fancy and ornamental flooring?

- Ans A. Garlic stone
 B. Imperial stone
 C. Ransom stone
 D. Victoria stone

Question ID : 486324707

Status : Not Answered

Chosen Option : --

Q.53 The condition for the maximum discharge through a circular channel can be expressed as:

- Ans A. Depth = $0.95 \times$ Diameter of the circular channel
 B. Depth = $95 \times$ Diameter of the circular channel
 C. Depth = $5 \times$ Diameter of the circular channel
 D. Diameter of the circular channel = $0.5 \times$ Depth

Question ID : 486324765

Status : Answered

Chosen Option : A

Q.54 The direct method of contouring is preferred:

- Ans A. when more accuracy is required
 B. when less accuracy is required
 C. for small areas and when more accuracy is required
 D. when area is small

Question ID : 486324729

Status : Answered

Chosen Option : C

Q.55 The term used to indicate the sundry solid waste from offices, residences and other buildings, waste building materials, broken furniture, rags etc., is:

- Ans A. sullage
 B. sewage
 C. rubbish
 D. garbage

Question ID : 486324781

Status : Answered

Chosen Option : C

Q.56 Density index is defined as:

- Ans A. ratio of bulk density to density
 B. sum of density and bulk density
 C. ratio of density to bulk density
 D. product of density and bulk density

Question ID : 486324701

Status : Answered

Chosen Option : A

Q.57 Granite, Gabbro and Basalt are different types of:

- Ans A. igneous rock
 B. sedimentary rock
 C. cohesive soil
 D. metamorphic rock

Question ID : 486324737

Status : Answered

Chosen Option : A

Q.58 A stream function is given by $\psi = 5x - 6y$. The direction of the resultant velocity at any point is determined as:

- Ans A. $49^\circ 48'$
 B. $39^\circ 48'$
 C. $19^\circ 48'$
 D. $29^\circ 48'$

Question ID : 486324770

Status : Not Answered

Chosen Option : --

Q.59 The work saved by fitting an air vessel in a single-acting reciprocating pump is _____, while in case of a double-acting reciprocating pump, the work saved is _____.

- Ans A. 25%; 25%
 B. 39.2%; 84.8%
 C. 50%; 50%
 D. 84.8%; 39.2%

Question ID : 486324767

Status : Answered

Chosen Option : C

Q.60 Which harmful substances in brick earth do not allow the clay to be mixed thoroughly, spoil the appearance of the brick and it may crack while working?

- Ans A. Lime
 B. Iron pyrites
 C. Alkalies
 D. Pebbles, gravels and grits

Question ID : 486324715

Status : Answered

Chosen Option : D

Q.61 Which scale is used to read units, tens and hundreds?

- Ans A. Simple scale
 B. Diagonal scale
 C. Plain scale
 D. Vernier scale

Question ID : 486324722

Status : Answered

Chosen Option : B

Q.62 Which of the following is NOT a physical weathering agent?

- Ans A. Climate change
 B. Heavy rainfall
 C. Acidic rain
 D. Freeze - thaw cycle

Question ID : 486324743

Status : Answered

Chosen Option : C

Q.63 A closed traverse ABCD is running in anticlockwise direction. If the fore bearing of line AB is 120° and that of line BC is 55° , then the included angle B between line AB and line BC is _____.

- Ans A. 50°
 B. 230°
 C. 115°
 D. 20°

Question ID : 486324724

Status : Answered

Chosen Option : C

Q.64 Select the Chezy's formula from the given options.

- Ans A. $V = \sqrt{ckmi}$
 B. $V = C\sqrt{mi}$
 C. $V = Cim\sqrt{i}$
 D. $V = Ckmi^2$

Question ID : 486324762

Status : Answered

Chosen Option : B

Q.65 Which of the following equations correctly represents the equation of zero air void line?
(Symbols have their usual meanings)

- Ans A. $\rho_d = \frac{G\rho_w}{e + \frac{1}{G_s}}$
 B. $\rho_d = \frac{\rho_w}{w + \frac{1}{G_s}}$
 C. $\rho_d = \frac{\rho_w}{G_s + \frac{1}{e}}$
 D. $\rho_d = \frac{\rho_w}{1 + e}$

Question ID : 486324748

Status : Answered

Chosen Option : B

Q.66 The true bearing of a line is $38^\circ 25' 50''$ and the magnetic declination at the place of observation is $3^\circ 00' 50''$ E on the date of observation. The magnetic bearing of the line is:

- Ans A. $32^\circ 20' 20''$
 B. $41^\circ 26' 40''$
 C. $32^\circ 00' 20''$
 D. $35^\circ 25' 00''$

Question ID : 486324723

Status : Answered

Chosen Option : D

Q.67 Which of the following characteristics of good timber is INCORRECT?

- Ans A. Sweet smell and a shining fresh cut surface
 B. When struck sonorous sound is produced
 C. Compact medullary rays
 D. Broader annual rings

Question ID : 486324709

Status : Answered

Chosen Option : D

Q.68 During an experimental investigation, the Poisson's ratio of soil was found to be 0.33. Assuming a plane strain condition, what would be the approximate value of the coefficient of earth pressure at rest?

- Ans A. 1.00
 B. 0.66
 C. 0.50
 D. 0.33

Question ID : 486324741

Status : Answered

Chosen Option : C

Q.69 औद्योगिक नगरों में, पत्थरों को किस विलयन के अनुप्रयोग द्वारा संरक्षित किया जाता है?

- Ans A. CaCl_2
 B. H_2SO_4
 C. दाहक क्षार (caustic alkalis)
 D. बैराइटा (baryta)

Question ID : 486324713

Status : Not Answered

Chosen Option : --

Q.70 A cohesive frictional soil has an effective cohesion of 20 kPa, the effective friction angle = 18° and a unit weight of 17 kN/m³. What would be the depth of the tension crack?

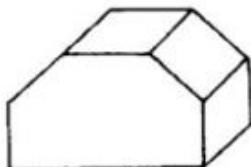

- Ans A. 5.76 m
 B. 3.24 m
 C. No cracks would develop
 D. 1.18 m

Question ID : 486324750

Status : Answered

Chosen Option : B

Q.71 Identify the forms of brick shown in the figure.

- Ans A. Coping
 B. Perforated
 C. Bull nosed
 D. Double cant

Question ID : 486324716

Status : Answered

Chosen Option : D

Q.72 A rough estimate of the quantity (A) of dynamite required in grams for blasting rocks is given by:

(Where, L = Length of line of least resistance.)

- Ans A. $\frac{L^3}{0.002}$
 B. $\frac{L^2}{0.008}$
 C. $\frac{L^2}{0.002}$
 D. $\frac{L^3}{0.008}$

Question ID : 486324706

Status : Answered

Chosen Option : B

Q.73 Platinum cobalt scale is used to measure the:

- Ans A. taste of water
 B. odour of water
 C. colour of water
 D. temperature of water

Question ID : 486324783

Status : Answered

Chosen Option : C

Q.74 The shearing strength of wood along the fibres is:

- Ans A. 10 to 30 N/mm²
 B. 6.5 to 14.5 N/mm²
 C. 2.5 to 3 N/mm²
 D. 20 to 30 N/mm²

Question ID : 486324711

Status : Answered

Chosen Option : D

Q.75 Which of the following options shows the relation between the fore bearing and the back bearing?

- Ans A. $BB = 180 \pm FB$
 B. $BB \geq 180 \pm FB$
 C. $BB = 180 + FB$
 D. $BB = 180 - FB$

Question ID : 486324727

Status : Answered

Chosen Option : A

Q.76 Which of the following statements regarding the kiln seasoning of timber is INCORRECT?

- Ans A. It is quite technical and expensive.
 B. Kiln seasoned timber is more amenable to attack of insects and fungi.
 C. It requires less stacking space.
 D. Wood is more thoroughly and evenly dried.

Question ID : 486324710

Status : Answered

Chosen Option : D

Q.77 The ability of a material to change its shape under load without cracking and to retain this shape after the load is removed is known as:

- Ans A. hardness
 B. plasticity
 C. brittleness
 D. elasticity

Question ID : 486324704

Status : Answered

Chosen Option : D

Q.78 With increase in compactive effort, the maximum dry density of soil:

- Ans A. increases
 B. shows irregular behaviour
 C. decreases
 D. remain constant

Question ID : 486324739

Status : Answered

Chosen Option : A

Q.79 Select the Darcy-Weisbach formula from the given options.

- Ans A. $h_f = (10fLv^2)/d^2.g$
 B. $h_f = (4fLv^2)/d.2g$
 C. $h_f = (0.5fkLv^2)/d.4g$
 D. $h_f = (2fLv^2)/d.8g$

Question ID : 486324761

Status : Answered

Chosen Option : B

Q.80 Examination of turbidity of water comes under:

- Ans A. bacterial test
 B. biological test
 C. physical test
 D. chemical test

Question ID : 486324777

Status : Answered

Chosen Option : C

Q.81 Which method of calculating the RL of any point gives the complete check of back, fore and intermediate observations?

- Ans A. Method of contouring
 B. Rise and fall method
 C. Height of instrument method
 D. Method of fly levelling

Question ID : 486324728

Status : Answered

Chosen Option : B

Q.82 The coefficient of discharge in orifice for the external mouthpiece, the internal mouthpiece (running full), the internal mouthpiece (running free) and the convergent-divergent mouthpiece is:

- Ans A. 1, 0.5, 0.5 and 1, respectively
 B. 0.85, 0.70, 0.50 and 1, respectively
 C. 0.5, 1, 1 and 0.5, respectively
 D. 1, 0.50, 0.70 and 0.85, respectively

Question ID : 486324759

Status : Answered

Chosen Option : B

Q.83 If in a standard proctor test, due to negligence, the number of blows given per layer was increased to 30, then approximately what would be the value of compactive effort in kN-m/m³?

- Ans A. 709
 B. 397
 C. 591
 D. 1105
