Language Comprehension

Based on the reading of the passage below answer questions 151 to 155 that follow:

Good writing should be governed by the rule that a man can think only one thing clearly at a time; and, therefore, that he should not be expected to think two or even more things in one and the same moment. But this is what is done when a writer breaks up his principle sentence into little pieces for the purpose of pushing into the gaps thus made two or three other thoughts by way of parenthesis, whereby unnecessarily confusing the reader. And here it is again it is again my own country men who are chiefly at fault. That German lends itself to this way of writing makes the thing possible, but does not justify it. No prose reads more easily or pleasantly than French, because as a rule, it is free from the error in question. The Frenchmen strings his thoughts together, as far as he can, in the most logical and natural order and so lays them before his reader one after the other for convenient deliberation, so that every one of them may receive undivided attention. The German, on the other hand, weaves them together into a sentence which he twists and crosses, and crosses and twists again; because he wants to say six things all at once, instead of advancing them one by one.

151. Good writing is governed by the rule that
a) Man can only think of one thing at all times.
b) Man cannot think of two or three things ever.
