Read the passage and the question that follow :

His uncle at the British barracks had told him when he first expressed the wish to be a sahib that he would have to go to school if he wanted to be one. And he had wept and cried to be allowed to go to school. But then his father had told him that schools were meant for the babus, not for the lowly sweepers. He hadn't quite understood the reason for that then. Later at the British barracks he realized why his father had not sent him to school. He was a sweeper's son and could never be a babu. Later still he realized that there was no school which would admit him because the parents of the other children would not allow their sons to be contaminated by the touch of the low-caste man's sons. How absurd, he thought, that was, since most of the Hindu children touched him willingly at hockey and wouldn't mind having him at school with them. But the masters wouldn't teach the outcastes, lest their fingers which guided the students across the text should touch the leaves of the outcastes' books and they be polluted. These old Hindus were cruel. He was a sweeper, he knew, but he could not consciously accept that fact. He had begun to work at the latrines at the age of six and resigned himself to the hereditary life of the craft, but he dreamed of becoming a sahib. Several times he had felt the impulse to study on his own. Life at the Tommies' barracks had fired his imagination. And he often sat in his spare time and tried to feel how it felt to read. Recently he had actually gone and bought a first primer of English. But his self-education hadn't proceeded beyond the alphabet. Today as he stood in the sun looking at the eager little boy dragging his brother to school, a sudden impulse came on him to ask the babu's son to teach him.
