(Q. Nos. 57-61):

Read the passage carefully and answer to the questions given below :

At a practical level, the importance of the question 'Equality of What?' derives the actual diversity of human beings so that demanding equality in terms of one variable tends to clash - in fact and not just in theory - with wanting equality in terms of another. We are deeply diverse in our internal characteristic (such as age, gender, general abilities, particular talents, proneness to illnesses and so on) as well as in external circumstances (such as ownership of assets, social backgrounds, environmental predicaments, and so on). It is precisely because of such diversity that insistence on egalitarianism in one field requires the rejection of egalitarianism in another.

- What are the external characteristics of Human Diversity? 57.
