GENERAL ENGLISH

Direction: Read the following passage and answer the questions that follow (Question Nos. 66-67). Your answers to these questions should be based on the passage only.

Passage

The long-standing idea that language is a tool of communication does not have any contemporary relevance. Because, many modern theories of linguistic philosophy have argued against this notion of language as merely a medium of exchange of ideas and thoughts between people. Instead, these modern theories of language say that language does not just represent the reality, rather, it also plays a significant part in creating reality. According to this, languages not only help us share our thoughts and ideas but also create our thoughts and ideas. This shift in linguistic notion has been one of the prominent motives behind modern philosophical evolutions.

66. Modern linguistic theories argue that

- Language is mere a tool of communication
- Language is a medium of exchange of our ideas and thoughts
- Language just represents reality
- Language plays a role in creating reality

67. What is a long-standing idea?

Direction: Read the following passage and answer the questions that follow (Question Nos 97-99). Your answers to these questions should be based on the passage only.

Passage

Professional disparity is a recent phenomenon. Some centuries ago, before the advent of scientific machinery and technology people found less inequality between various jobs. Due to these inventions, the notion that mental labor is superior to physical labor emerged. The privileged class could easily take the ownership of production industry saying that they have the necessary managerial skills and as a result, the rest of the population ended in the pool of physical labor. This disparity further continued to the financial sector due to the imbalance in the return between physical and mental labor. People with mental skills continued to become rich and prosperous. While the physical laborers confronted misery and poverty.
