Que. 41 | **Directions: Read the passage and answer the questions:**

In the annals of history, the Battle of Thermopylae stands as a timeless testament to the extraordinary **valour** and sacrifice of a small band of warriors. In 480 B.C., a mighty Persian army, numbering hundreds of thousands, marched south towards Greece, intent on conquering the independent city-states that stood in their path. A small force of 300 Spartans, led by the legendary King Leonidas, stood as the last line of defence against this formidable invasion.

Despite being vastly outnumbered and outgunned, the Spartans fought with **unwavering** courage and determination. They held their ground at the narrow pass of Thermopylae, repelling wave after wave of Persian attacks. The Persians, unable to break through the Spartan defences, **probed** for weaknesses in their formation, but the Spartans stood firm, their shields forming an impenetrable wall against the onslaught of arrows and javelins.

As the battle raged, the Spartans fought with incredible skill and bravery. They hurled javelins and spears, crushing the skulls of their enemies. They used their swords to devastating effect, cutting down any Persian who dared to come within reach. The air was filled with the clang of swords, the thud of bodies hitting the ground, and the cries of dying men.

However, despite their heroic efforts, the Spartans were ultimately outnumbered. The Persians, using their sheer weight of numbers, eventually forced a passage through their lines. Leonidas and his men fought to the last, falling with their shields still raised. Their sacrifice inspired the Greeks to fight on and ultimately defeat the Persian invasion, but the Battle of Thermopylae remains a poignant reminder of the courage and sacrifice of those who stood against overwhelming odds.

The Battle of Thermopylae is a timeless tale of courage, sacrifice, and the triumph of the human spirit over adversity. The valour of the 300 Spartans serves as an eternal reminder that even the smallest of forces can make a profound difference in the course of history. Their sacrifice continues to inspire people around the world, reminding us that courage and determination can overcome even the most daunting of challenges.

What can be inferred from the statement: "Their sacrifice inspired the Greeks to fight on and ultimately defeat the

Persian invasion."?

1. The Greeks were motivated by the Spartans' sacrifice to continue fighting and achieve victory.
2. The Spartans' sacrifice weakened the Greeks and made them less likely to succeed in their fight against the Persians.
3. The Greeks were impressed by the Spartans' courage but did not use it to improve their own strategies.
4. The Spartans' sacrifice had no significant impact on the outcome of the Persian invasion.
5. The Greeks continued fighting despite the Spartans' sacrifice, but the Persians ultimately defeated them.
